

EasiSolv 120 Solvent Cleaner

EasiSolv 120 is a fast drying solvent cleaner formulated to effectively dissolve and remove printing inks from screen printing mesh, squeegees, flood bars and presses. The combination of components is designed to solubilize and remove virtually every type of ink and minimize any remaining stains.

SPECIAL FEATURES:

EasiSolv 120 is non-hazardous. There are no threshold limit values (TLV's). None of the components are SARA reportable.

EasiSolv 120 has a high flash point yet will evaporate quickly and without leaving a residue which makes tape applications very simple and lasting.

EasiSolv 120 effectively dissolves most inks, including: conventional, electronic, solder mask, UV, plastisol and water-based.

APPLICATION:

EasiSolv 120 Solvent Cleaner may be used manually, with recirculating systems or automatic machines.
